Playing Video Games

Listening to songs

PROFESSIONAL SUMMARY

Experienced Full Stack Software Engineer in MERN stack development, including expertise in React Native. Proven track record of delivering high-quality code for web and mobile applications. Collaborative team player with a passion for problem-solving. Eager to contribute skills and adapt to new challenges in a dynamic environment.

PROFESSIONAL EXPERIENCE

Software Engineer

askfundu 📁

02/2023 – present | Gurugram, India

- Designed and developed robust and scalable web applications using a full stack approach, encompassing both front-end and back-end development.
- Collaborated with cross-functional teams, including product managers and UX/UI designers, to understand project requirements and deliver high-quality solutions.
- Built a React Native mobile application from scratch, leveraging the power of JavaScript to create a cross-platform app with native-like performance and user experience.
- Developed server-side components using Express and integrated them with databases and external services.
- Deployed app AWS ensuring smooth and efficient deployment processes.
- Stayed updated with the latest industry trends and technologies, continuously learning and applying new skills to enhance development practices.
